

EVR Pro 9-Camera Video Recorder

Model **EVR9CHPRO**

EVR Pro 9-Camera Video Recorder

Overview

VUON EVR 9-Channel — Edge Video Recorder

Intelligent Video Recording. Assured. Always.

VUON EVR 9-Channel is a compact, enterprise-ready Edge Video Recorder designed for reliable recording, storage, playback and remote management of IP camera systems. It brings multi-camera recording, smart playback, flexible retention policies and secure remote access together in a dedicated edge appliance.

Key Features

Up to 9 IP Cameras

Connect and manage **up to 9 IP cameras** from a single VUON EVR, making it suitable for offices, retail stores, schools, warehouses, institutions and other small-to-medium surveillance deployments.

Secure Video Recording

Keep surveillance footage securely stored at the edge with support for **AES-256 encryption**, helping protect recorded video and sensitive surveillance data.

H.265 / H.264 Support

Efficient video compression using **H.265 / H.264** helps optimize storage utilization while maintaining video quality.

High-Resolution Recording

Supports recording resolutions of **up to 16MP**, subject to camera compatibility and system configuration.

Smart Video Search

Quickly locate recorded footage using multiple search parameters including:

- Date
- Time
- Event
- Camera

► **Smart Playback**

Review recorded footage efficiently with multiple playback options designed to make incident investigation faster and easier.

Flexible Recording & Retention

Configure recording and retention policies according to your surveillance requirements, allowing organizations to manage available storage efficiently.

Remote Access

Access your surveillance system remotely through supported:

- Web interface
- Mobile application
- Windows CMS

▲ **Cloud Support**

VUON EVR supports secure cloud-connected video workflows, providing an additional option for remote access and video management.

Built for Modern IP Surveillance

VUON EVR is designed around an **edge-first recording architecture**, keeping video recording close to the cameras while providing centralized access and management.

IP Cameras → VUON EVR → Local Storage → Web / Mobile / CMS / Cloud

This architecture helps organizations maintain local recording while enabling convenient remote monitoring and management.
