

Shutter Sensor

Model **SHS-0702**

Shutter Sensor

Overview

Heavy-duty magnetic shutter sensor designed for industrial and commercial security applications. Built with a rugged aluminum alloy housing and stainless steel armored cable, the sensor is epoxy resin filled for superior waterproof and dustproof performance. Ideal for harsh environments and high-reliability installations.

Key Features

- Durable **metal (aluminum alloy) enclosure**
- **Stainless steel armored cable** for mechanical protection
- **Epoxy resin sealed** for waterproof and dustproof operation
- Wide **75 mm sensing gap** for flexible installation
- **Dust** surface-mount design with screw fixing
- Suitable for indoor and outdoor use

Use Cases

- **Roller shutter security systems**
- **Warehouse and industrial door monitoring**
- **Garage door position detection**
- **Sliding gate and door protection**
- **Commercial perimeter security systems**

Technical Specifications

Brand	ITL
Cable	Stainless steel armored tube
Contact Type	Magnetic reed switch
Finish	Metallic silver

Gap Distance	75 mm
Material	Aluminum alloy housing
Mounting	Surface mount with screws
Product	Shutter Sensor
Protection	Epoxy resin filled
Size	10 x 75 x 10 mm

Warranty & Support

Returnable
