

PIR Motion Sensor

Model **PIRS-1233**

PIR Motion Sensor

Overview

Reliable PIR motion sensor designed for indoor security applications. Using passive infrared technology, it detects human movement with high accuracy while minimizing false alarms. Compact and easy to install, it integrates seamlessly into modern security systems.

Key Features

- Advanced **passive infrared detection**
- Wide **110° detection angle**
- Up to **12 meters sensing range**
- **Low false alarm rate** with stable performance
- Compact **wall-mount design**
- Compatible with most **alarm control panels**

Use Cases

- **Home security systems**
- **Office intrusion detection**
- **Retail store monitoring**
- **Warehouse motion detection**
- **Smart alarm and automation systems**

Technical Specifications

Color	White
Detection Angle	110°
Detection Distance	8-12 meters
Installation Height	2.2-2.5 meters
Material	ABS housing

Mounting	Wall mount
Product	PIR Motion Sensor
Type	Passive Infrared (PIR)
Voltage	9-16V DC

Warranty & Support

Returnable
